2. loeng

- ▶ Tagasiside
- ▶ Kodused tööd
- ▶ Middleware

Praegu on nii ...

Eesmärk

Struktuur

routes – kuhu suunata?

controllers – mida vaja teha?

services – teeb tööd (otsib andmeid)

helpers – abivahendid

Modules

Moodulis:

```
module.exports = myModule;
```

Index.js failis:

```
const myModule = require('myModule');
```

userController.js

```
const usersController = {  
  readUsers = (req, res) => {},  
  readUserById = (req, res) => {},  
  createUser = (req, res) => {},
```

...

```
} ;
```

```
module.exports = usersController;
```

index.js

```
const usersController = require('./usersController');

app.get('/api/users', usersController.readUsers);

app.get('/api/users/:id', usersController.readUserById);
```

Kodune töö

- ▶ Väljapääsupilet:
- ▶ <https://bit.ly/35pcOc3>
- ▶ Oma projektiarendamine –
paroolide hashimine, autentimine,
JWT
